Sacru, misterios, vindecator, seducator, indispensabil, parfumul a strabatut istoria odata cu omul. Perceput initial ca un liant intre muritori si divinitate, considerat apoi leac si protector impotriva molimelor, folosit dintotdeauna pentru stimularea atractiei intre parteneri, parfumul se incadreaza perfect in descrierea facuta de Michael Edwards, erudit cunoscator si autor al ghidului "Parfums du Monde": "este un poem silentios, parte a limbajului invizibil al corpului. Ne poate insori zilele, bantui noptile si insoti lanturile amintirilor"
